Harter Nitrolite

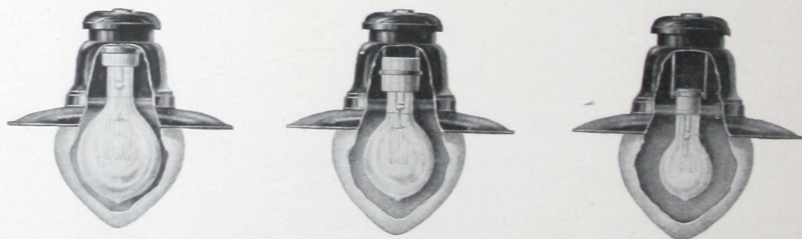

Positionable Socket

An Exclusively Nitrolite Principle

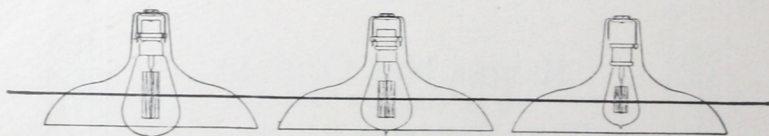

You get the exact field of light that you want—wide and diffused, or small and concentrated—by raising or lowering lamp in the reflector.

Harter Positionable Sockets may be adjusted over a vertical range of three inches.

Lamps of **any** size may be positioned for best results in **any** style fixture.

Note how varying sizes of lamps may be lined up to the same position in the same reflector.

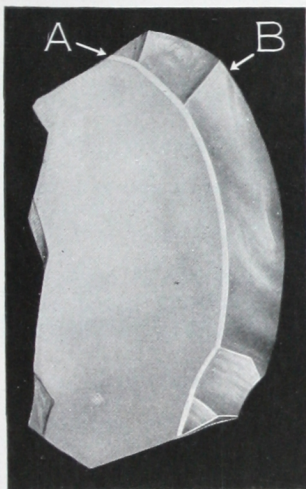

Harter Nitrolite

Glorianna (Two Layer) Glass

Exclusively used on Harter Nitrolites

A.

*Bubble
thin
inside
layer of
diffusing
glass
to soften
and scatter
the light.*

Magnified two diameters

B.

*Thicker
outside
layer
of
clear
glass
for
strength.*

Imagine a mere bubble of *milky white glass* !

If it were not so fragile it would make an ideal globe, diffusing light to the maximum and with little light absorption.

In *Glorianna Glassware* this milky bubble appears as an inside layer of a transparent globe.

We *could* use common glass (disguised by a fancy name) but it would be poor economy.

Glorianna glass gives the user a better, less wasteful lighting unit and its obvious superiority materially decreases our selling expense.

Remember: *fixtures are bought but once* while electric light bills are continuous and in a year poor glass may cost you several times the original investment.

Harter Deluxlite

Patented and Patents Pending

A Harter Fixture designed especially for Nitrogen Lamps and embodying all the good and exclusive qualities that "NITROLITE" stands for.

A Modern Method

of illumination blending soft filtered light with reflected rays from a dull white surface. The glassware is Glorianna, two layer; the reflector is steel fire enameled white, dull finished by non-acid process.

Beautiful

lines and the velvety white of glassware and reflector harmonize thoroughly with modern architecture.

Approved

Patented construction eliminating fire danger, is recognized by Underwriters who approve Harter Deluxlite for use on ceilings.

For pendant types see page 6. Descriptive matter on shallow types and special finishes furnished on application.

Harter Nitrolite Adjusto-Sockets

Adjusto-socket 2 1/4 in.
Ventilated holder

Adjusto-Socket 3 1/4 in.
Ventilated holder

Deep Bowl

Flat Cone

Shallow Bowl

Angle Bowl

As in the larger Nitrolites, sockets can be raised or lowered in these holders for large or small lamps or to obtain a different distribution of light (see page 2).

Adjusto-Sockets are equipped with brass bushings threaded for 1/2 in. pipe (3/8 in. if specified). For drop cord work a porcelain bushing (No. 345) may be inserted instead of pipe.

Reflectors listed below or glass shades with proper size fitter may be used.

Caution:—Be sure to order Adjusto-Sockets and Reflectors with same size fitter.

Adjusto Socket—2 1/4 in. Ventilated Holder

Harter Nitrolite

Cast Iron Fixture

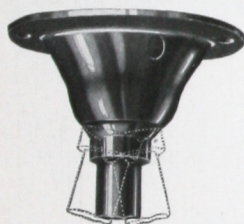

No. 194

An easy-to-wire cast iron fixture for close-to-the-ceiling work. It supports the shade, either glass or metallic with $3\frac{1}{4}$ inch fitter, by means of a positive phosphor bronze catch—no holder screws.

The socket may be adjusted up or down and set at desired position by tightening two external screws.

Top flange is $4\frac{1}{4}$ inch dia. and fits 4 inch round outlets (drilled for 3 inch if specified) and top is threaded for $\frac{1}{2}$ inch stem.

No.	Finish	List Price
193	Japanned Black	\$3.00
194	Cameo White	3.50

No. 40

No. 40 Canopy Aligner

Canopy attaches to standard 4 inch round outlet box and has a universal joint with $\frac{1}{2}$ inch female pipe thread. This joint permits stem to swing freely in all directions without twisting the wires and insures a perfect alignment because fixture stems will always hang vertical.

Regularly furnished in galvanized finish and with knockout for pull switch.

List price, each.....\$0.60

Black Japanned finish, 10% additional.

Cameo White finish, 15% additional.

Furnished with Hubbell No. 6437 or similar pull switch, 10 ft. cord and switch insulation, at \$1.50 list additional.

No. 53

Table No. 1 Discounts apply to above prices

Safety Shade Holders

For use with Cover Sockets

This shade holder is simple and positive with phosphor bronze springs which grip the shade. Shade cannot be disengaged accidentally.

Made in two sizes regularly furnished in galvanized finish.

Harter Nitrolite

Hinged Type Patented

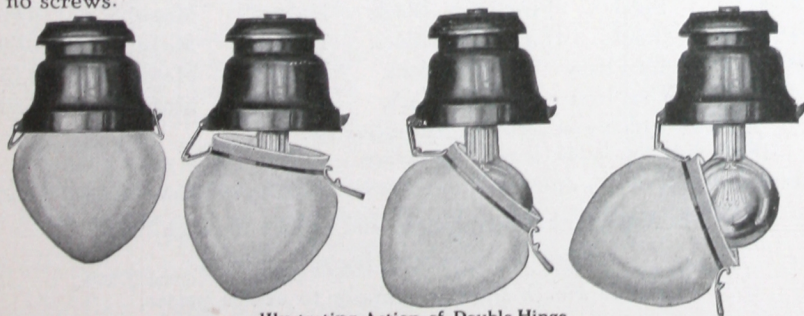

The **double hinge** and **screwless globe-holder** are the distinguishing features of the hinged type Nitrolite.

The advantage of the **Double Hinge** over hinges ordinarily used on fixtures is that lamp may extend down into the globe as it should without danger of being broken when globe is swung open.

Harter Fixtures with or without reflectors are double hinged.

Globes are held firmly into collar or reflector by positive catch—no screws.

Harter Nitrolite

Floodlight Projectors

No. 2415 $\frac{1}{2}$ S

No. 2415 $\frac{1}{2}$

Nitrolite Projectors are especially suited to the economical lighting of building exteriors, play grounds or night work of any kind. They are portable, require very simple wiring and may be mounted anywhere in a few moments.

Mountings are cast iron, swiveled and jointed so that after base plate has been bolted down projector may be operated as a search light or set facing in any direction. These units may be furnished with structural steel stand instead of base plate.

Housings are of heavy steel, rust proof, weather proof and ventilated.

Harter Projectors are equipped with compound parabolic aluminum reflectors which are permanently bright and throw a powerful beam of light. Simple devices for centering lamp and for controlling divergence of light beam are an important feature of these Projectors.

No. 2415 $\frac{1}{2}$ S

For use with regular Nitrogen (Type C) lamp, 300 to 1000 watt.

Beam: Diverges at angle of from 22 to 40 degrees.

Body: Steel fire enameled black outside, white inside, ventilated.

Mounting: Cast iron universal adjustment on 34 inch structural steel stand.

Reflector: Polished aluminum compound paraboloid, 14 inch diameter.

Socket: Porcelain mogul base, positionable for long or short lamps.

List Price: (Less lamp and wiring).....\$60.00

No. 2415 $\frac{1}{2}$

Same as No. 2415 $\frac{1}{2}$ S but mountings are on cast iron base plate, drilled at four corners, instead of on steel stand.

List Price: (Less lamp and wiring).....\$50.00

For bracket mounting a 2 $\frac{1}{2}$ inch by 7 $\frac{1}{2}$ inch base plate will be furnished, no extra charge.

Prices do not include lamps or wiring

Table No. 1 Discounts apply to above prices.

Harter Nitrolite

Spotlight Projectors

No. 2414 1/2

No. 2412

Stand takes either projector

These units are similar in construction to the Flood-lighting Projectors shown on opposite page but are designed for use with the special Floodlighting lamps.

Lamp used has a concentrated filament and short focal length and with the compound parabolic reflector throws a narrow intense beam of light. Hence the name "Spot Light."

No. 2414 1/2

For use with special concentrated filament 400 watt lamp.

Beam: Diverges at angle of from 8 to 15 degrees.

Body: Heavy steel, galvanized and japanned; ventilated.

Mountings: Cast iron universal adjustment on cast iron base plate, drilled with two holes.

Reflector: Polished aluminum, compound paraboloid, 14 inch diameter.

Socket: Porcelain mogul base with micrometer focusing adjustment.

List Price: (Less lamp and wiring).....\$40.00

No. 2412

For use with special concentrated filament 200 watt lamp.

Beam: Diverges at angle of from 9 to 30 degrees.

Structure and design are like No. 2414 1/2 but smaller.

Socket is medium base with sliding adjustment to focus lamp, and reflector is 12 inch diameter.

List Price: (Less lamp and wiring).....\$35.00

No. 2414 1/2 S

Like No. 2414 1/2, but mounted on a 36 inch cast iron tripod and stem instead of small base plate.

List Price: (Less lamp and wiring).....\$46.00

No. 2412S

Like No. 2412, but mounted on a 36 inch cast iron tripod and stem instead of small base plate.

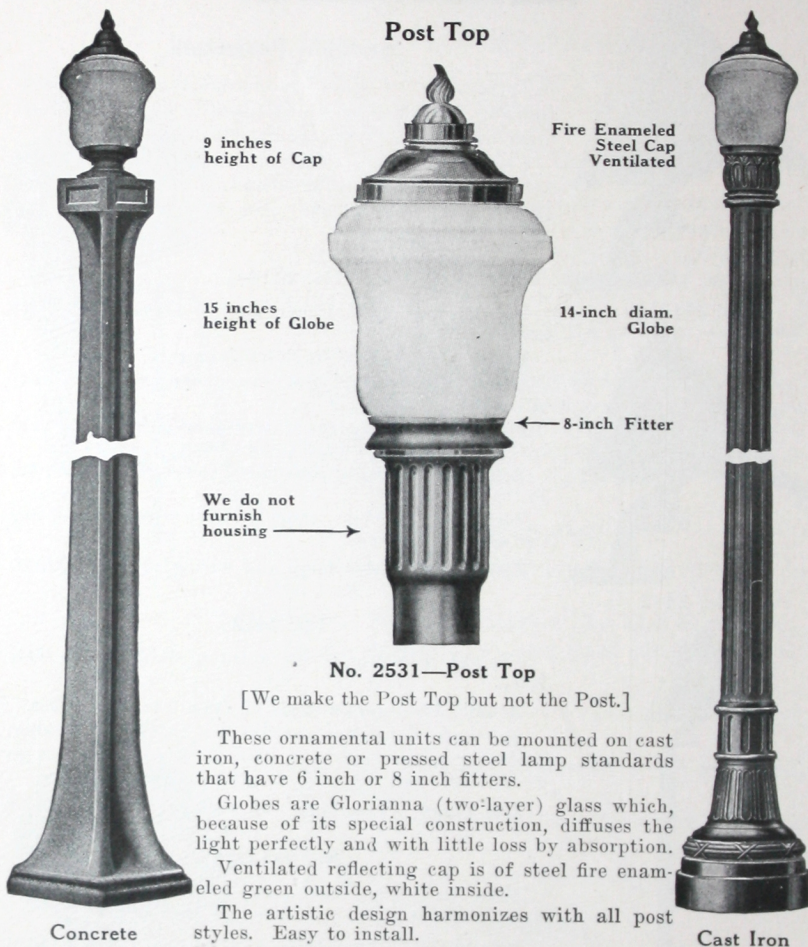

List Price: (Less lamp and wiring).....\$41.00

Prices do not include lamps or wiring

Table No. 1 Discounts apply to above prices

Post Top

No. 2531—Post Top

[We make the Post Top but not the Post.]

These ornamental units can be mounted on cast iron, concrete or pressed steel lamp standards that have 6 inch or 8 inch fitters.

Globes are Glorianna (two-layer) glass which, because of its special construction, diffuses the light perfectly and with little loss by absorption.

Ventilated reflecting cap is of steel fire enamelled green outside, white inside.

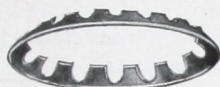

The artistic design harmonizes with all post styles. Easy to install.

For Your Information

Discount tables indicated by foot-notes throughout catalog.

All except chain fixtures when wired with No. 14 wire require no insulation.

Order by catalog number and mention jobber through whom you wish goods billed.

Packing will be charged at cost on all orders for glassware only and all other shipments amounting to less than \$50.00 list, (except Deluxlites on which there is no packing charge).

Prices and discounts are subject to change without notice.

Protect Yourself and Us.

Do not accept freight (or express) shipments containing broken glassware, or in which a shortage occurs without first obtaining a signed memorandum of same on freight bill.

Goods are packed with greatest care and our responsibility ends when we receive clear receipt for shipment from transportation company.

Obtain our permission before returning goods.
